

Academia+ brings together two perspectives:

- to support and consolidate the exchange and transnational training of **counsellors** in Europe
- to focus on the development of **training programmes** to address current key challenges in **labour market and counselling**

Academia+ facilitates the transitions between training and the world of work, as well as between different jobs and different countries.

Academia+ enables the exchange of country specific counselling and guidance methods relating to socio-economic and political issues.

Counsellors' Study and Training Exchange Programme for Key Challenges of European Labour Markets and Societies

Co-funded by the Erasmus+ Programme of the European Union

This project has been funded with support from the European Commission. This publication reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Training Concept and Didactical Framework of the Exchange Programmes

Professionalising Career Guidance and Counselling Practitioners across Europe

The Academia network: a programme for guidance practitioners made by guidance practitioners

For over 25 years, Academia has been the only European Network for career guidance and counselling practitioners, delivered and developed by other career guidance and counselling practitioners. The Academia+ project will use the potential of the network to develop targeted training units to further professionalise the learning of career guidance and counselling practitioners from all over Europe.

Challenges and European benefit

Guidance practitioners will be able to learn more about the newest approaches to tackle current and future challenges – an ageing workforce, the digitisation of jobs and the increased prevalence of migration. They will also have the opportunity to learn about other countries' approaches and experiences, both in theory and in practice. Therefore, Academia+ raises the Academia network to a higher level and prepares it for the future by also creating a digital learning environment which supports the one-week-learning units.

Effects and estimated outcomes

In the current decisive phase of the development of labour markets in the European Union, the Academia+ project provides an opportunity to attend 5 day research-based Study and Training Exchange Programmes. These programmes will be developed using a considered European approach to address the challenges of the refugee crises, demographic change and digitisation/future jobs.

Academia+ will provide Intellectual Outputs

The Intellectual Outputs (O1 – O3) consist of **one-week-study courses** for transnational participants coming from several European countries (3 one-weeks Counsellors' Study and Training Exchange Programmes (IO1, IO2, IO3 C-STEP).

The Intellectual Outputs (O4 - O5) are those related to the **course's online infrastructure**.

O1 Course unit: 'Counselling Migrants and Refugees'

O2 Course unit: 'Future Work' (Labour 4.0)

O3 Course unit: 'Demographic Change'

O4 Media centre and learning environment: complimentary content, material and resources

O5 Web portal: infrastructure
